Positioning for skills and knowledge for the Fourth Industrial Revolution

You will work collaboratively on projects that embrace the broad spectrum of learning activities and environments, typically learning and teaching focused and one that is multidisciplinary.

Your Continued Professional Development is absolutely vital. There is opportunity to gain digital credentials through our Microsoft Office Certification programme.

Improved confidence in the knowledge that they have the ability, skills and resilience with which to overcome challenges.

Creativity

You will provide design support for innovative pedagogic approaches and environments through the affordances of digital technology.

Research skills

Cross-disciplinary skills

Adaptability such as working on projects outside of familiar subject areas requiring drawing on past experience and development of new skills.

Using a variety of new creative design packages

New ways of thinking and collaboration

The combination of using design thinking methods, with risk management and creativity gives a unique insight into handling complex projects with real world impact and influence.

You will be actively engaged in the project, within a small team of other CreatorLab Fellows, taking responsibility and ownership in the process of improving University learning and teaching experiences and processes.

The projects encourage exploration, collaboration and partnership in developing high impact education resources.

Focused team working

Problem finding

Design thinking methodologies

The role itself is a short funded student-placement that sees students working in collaboration with academic staff to co-design high quality digital learning materials that contribute to the delivery of an outstanding student and learning experience.

Raising awareness of how new skillset can be adapted for the changing job sectors and shaping future thinking.

The Role will begin February 2021 until June 2021

Each CreatorLab Fellow role will require the completion of 16 hours of mandatory work, which are mandatory business and legal training courses, induction to the role, and writing a final reflective report to encapsulate your learning journey at the end of the project.

The projects themselves have an allowance of up to 42 hours per CreatorLab Fellow allocated to completing the project.

"Taking on this role has taught me how to work with diverse peoples, which turned to teach me an amazing work ethics with the experience in working in an agile environment, coupled with an outstanding interpersonal communication with stake holder skills which helps me to communicate effectively, plus the abilities to work individually as well as in a team, and being flexible, confident, and finally, it has also given me the enthusiasm to take on challenging task as well as helped me discover more of myself with a problem solving skills, I believe moving forward I will be able to execute every task given."
