

Academic Skills and Artificial Intelligence in Education

Friday 28th April 2023

Teesside University

Middlesbrough campus event

Together with Turnitin, Teesside University is hosting an institution-wide event bringing together a wide range of academics and practitioners to discuss how we continue to reimagine the support for the development of students' academic skills in light of generative AI tools. With the rise of generative AI systems like ChatGPT, this adds another layer of complexity to the issue of academic integrity. These systems can generate humanlike responses to a wide range of prompts, including essay questions. The question is: If the AI is good enough to produce something that could be a student's work, how will we ever really know what is the student's work and what was done by a machine? The event will be collaborative and aims to encourage conversations around how learning, knowledge creation, and assessments practices can be reimaged to support the development of future-readiness in our graduates.

09:30-09:45	Coffee, Introductions and context
09:45-10:15	Academic Skills and Graduate Attributes
10:15-11:00	Artificial Intelligence in Education
11:00-11:15	Break/Coffee
11:15-12:00	Academic Integrity
12:00-12:45	Top tips on using Feedback Studio: Features and Functionalities including its AI
12:45-13:00	Close and Next Steps

Bookings are currently open and will close on Monday 24th April at 12 noon.
